

# JAVIER BOTERO

## FULL STACK WEB DEVELOPER

javierbotero10271@gmail.com | [GitHub](#) | [LinkedIn](#) | [Twitter](#) | [AngelList](#) | [Portfolio](#)

### SUMMARY

Full Stack developer with over 5 years of experience, learning machine learning and gaining expertise in solving bugs and creating new features. Back-end enthusiast, and front-end admirer with a love for best code practices, and TDD. Strong foundations in Ruby, Python, and JavaScript. A prolific and continuous learner of new languages, libraries, and technologies.

### SKILLS

**Front-End:** JavaScript, TypeScript, React, Redux, NextJS, Tailwind, HTML5, CSS3, SASS, Bootstrap.

**Back-End:** Ruby, Python, Rails, MySQL, Node, Postgresql.

**Tools & Methods:** Matplotlib, Plotly, Tensorflow, Git, GitHub, Heroku, Netlify, RSpec, Jest, TDD.

**Professional:** Remote Pair-Programming, Teamwork.

### EXPERIENCE

MERU - PITZ

Full-Stack Developer

Remote

February 2024 – March 2025

Create features, help to design architecture, and resolve problems in the biggest auto parts company in the Mexican industry, developing workflows of the development, using linters, TDD, CI, and CD, having services talking to each other through requests, and dividing the back from the front-end.

- Create new features in the back end and then link them in the front end.
- Refactor queries to best time responses, so big chunks of data could be delivered faster.

ENTREPRENEURSHIP

Full-Stack Developer, DevOps

Developing self-webpages to help the artistic sector in Colombia and aim to make an impact on others:

**artistasparalavida.com** - Marketplace for artists and the Art and Entertainment sector in Colombia, where users can publish their services. Built on top of Spree gem.

SONATAFY

Back-end Developer

Remote

June 2022 – December 2022

Solved backend tickets. Work mainly with RoR, RSpec, and gRPC proto3.

- Solved more than 30+ tickets.
- Helped in the additions of properties and endpoints to gRPC services.
- Created integration tests for gRPC endpoint handlers, mimicking actual requests and finding possible edge cases to be tested.
- Fix bugs in the back end, helping improve the data displayed to the user.

### PROJECTS

**FunCourses** - Web app built to create and enroll in courses. Users can subscribe and unsubscribe to them.

- Built with Ruby on Rails as an API, React, and Redux. [View Repo](#).

### EDUCATION

MICROVERSE

Remote Full Stack Web Development Program, Full-Time

December 2019 – April 2021

- Gained strong foundations in algorithms, data structures, and full-stack development leveraging languages like Ruby, Rails, JavaScript, React, and Redux. Fulfilled more than 40+ projects complying with industry best practices.

UNITEC

Filmmaking, Digital Photography

January 2009 – September 2014
